

Bug Report

1. Bug ID/Title:

- Newsletter Subscription Checkbox Default State Not Saved
-

2. Description:

- The "Subscribe to newsletter" checkbox does not retain its selected state upon form submission.
 - This behavior creates confusion as users who believe they have subscribed to the newsletter are not added to the subscription list.
 - This issue could lead to missed marketing opportunities and user dissatisfaction.
-

3. Steps to Reproduce:

1. Navigate to the registration page hosted at <http://13.209.85.69/>.
 2. Fill out all required fields in the registration form:
 - Username: Enter "testuser".
 - Password: Enter "password123".
 - Email: Enter "test@example.com".
 3. Check the "Subscribe to newsletter" checkbox.
 4. Click the "Submit" button to register the account.
 5. Verify the user profile or database entry to check if the subscription status is updated.
-

4. Expected Result:

- The "Subscribe to newsletter" checkbox state should be retained upon submission.
 - The user should be marked as subscribed in the database or reflected in the user profile.
-

5. Actual Result:

- The "Subscribe to newsletter" checkbox state is ignored after submission.
 - The user is not marked as subscribed to the newsletter in the database.
-

6. Severity:

- Medium - While not critical to the application's core functionality, it impacts user experience and marketing processes, leading to potential loss of engagement.
-

7. Environment:

- Browser: Google Chrome 117.0.5938.92 (64-bit)
 - Operating System: Windows 10 Pro, Build 19045.2604
 - Device: Dell Latitude 5420
 - Server: <http://13.209.85.69/>
-

8. Attachments:

- Screenshot: "checkbox_bug.png" (demonstrates the checkbox state after submission).
 - Video: "checkbox_bug_reproduction.mp4" (illustrates the steps to reproduce).
 - Server Log: Excerpt highlighting the absence of subscription entries for this test case.
-

9. Additional Notes:

- This issue occurs consistently across multiple browsers (tested on Firefox and Edge).
- No error message or warning is displayed, making the issue non-obvious to users.
